# Forward-Looking Statements and Non-GAAP Financial Measures

## Forward-Looking Statements

Except for historical information, all of the statements, expectations, and assumptions contained in this presentation are forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995, including the future impact of the COVID-19 pandemic on our business, financial results and financial condition, anticipated financial results for the full year and third quarter 2021, our foundation for growth in 2021, including our sales pipeline, existing backlog and expectations of net awards, trends in cancellations and delays, expected interest rates, expected non-GAAP tax rate, expected DSO, client's potential product launch timelines, and plans for cost savings and capital deployment. Actual results might differ materially from those explicit or implicit in the forward-looking statements. Important factors that could cause actual results to differ materially include, but are not limited to: risks associated with the COVID-19 pandemic; the Company's potential failure to generate a large number of new business awards and the risk of delay, termination, reduction in scope, or failure to go to contract of business awards; the Company's potential failure to convert backlog to revenue; fluctuations in the Company's operating results and effective income tax rate; the impact of potentially underpricing the Company's contracts, overrunning cost estimates, or failing to receive approval for or experiencing delays with documentation of change orders; cybersecurity and other risks associated with the Company's information systems infrastructure; changes and costs of compliance with regulations related to data privacy; concentration of the Company's customers or therapeutic areas; the risks associated with doing business internationally; risks related to the impact of the U.K.'s withdrawal from the European Union; challenges by tax authorities of the Company's intercompany transfer pricing policies; the Company's potential failure to successfully increase its market share, grow its business, and execute its growth strategies; the Company's ability to effectively upgrade its information systems; the Company's failure to perform its services in accordance with contractual requirements, regulatory standards, and ethical considerations; risks related to the management of clinical trials; risks related to investments in the Company's customers' businesses or drugs and the Company's related commercial rights strategies; the need to hire, develop, and retain key personnel; the impact of unfavorable economic conditions, including the uncertain international economic environment, changes in exchange rates; effective income tax rate fluctuations; the Company's ability to protect its intellectual property; risks related to the Company's acquisition strategy, including its ability to realize synergies; the Company's relationships with customers who are in competition with each other; any failure to realize the full value of the Company's goodwill and intangible assets; risks related to restructuring; the Company's compliance with anti-corruption and anti-bribery laws; the Company's dependence on third parties; potential employment liability; the Company's ability to utilize net operating loss carryforwards and other tax attributes; downgrades of the Company's credit ratings; competition in the biopharmaceutical services industry; outsourcing trends and changes in aggregate spending and research and development budgets; the impact of, including changes in, government regulations and healthcare reform; the Company's ability to keep pace with rapid technological change; the cost of and the Company's ability to service its substantial indebtedness; other risks related to ownership of the Company's common stock; and other risk factors set forth in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2020 as updated by the Company's other SEC filings, copies of which are available free of charge on the Company's website at investor.syneoshealth.com. The Company assumes no obligation and does not intend to update these forward-looking statements, except as required by law.

## Non-GAAP Financial Measures

In addition to the financial measures prepared in accordance with U.S. Generally Accepted Accounting Principles ("GAAP"), this presentation contains certain non-GAAP financial measures, including segment adjusted revenue, adjusted net income (including adjusted diluted earnings per share), EBITDA, adjusted EBITDA, adjusted EBITDA margin, and non-GAAP effective tax rate. We also include in this presentation non-GAAP financial measures to illustrate our cash flow and leverage profile, including net debt, net leverage, and free cash flow. We also present revenue growth in constant currency. Constant currency revenue growth is defined as revenue restated at the comparative period's foreign currency exchange rates measured against the comparative period's revenue. A "non-GAAP financial measure" is generally defined as a numerical measure of a company's financial performance that excludes or includes amounts from the most directly comparable measure calculated and presented in accordance with GAAP in the statements of operations, balance sheets, or statements of cash flows of the Company.

The Company defines segment adjusted revenue as segment revenue adjusted to include revenue eliminated as a result of purchase accounting.

The Company defines adjusted net income (including adjusted diluted earnings per share) as net income (including diluted earnings per share) excluding restructuring and other costs; transaction and integration-related expenses; share-based compensation expense; loss on extinguishment of debt; and other income (expense), net. After giving effect to these items, the Company has also included an adjustment to its income tax rate to reflect the expected long-term income tax rate.

EBITDA represents earnings before interest, taxes, depreciation and amortization. The Company defines adjusted EBITDA as EBITDA, further adjusted to exclude expenses and transactions that the Company believes are not representative of its core operations, namely: restructuring and other costs; transaction and integration-related expenses; share-based compensation expense; other income (expense), net; and loss on extinguishment of debt. The Company presents EBITDA and adjusted EBITDA because it believes they are useful metrics for investors as they are commonly used by investors, analysts and debt holders to measure the Company's ability to fund capital expenditures and meet working capital requirements.

Each of the non-GAAP measures noted above are used by management and the Board to evaluate the Company's core operating results because they exclude certain items whose fluctuations from period-to-period do not necessarily correspond to changes in the core operations of the business. Adjusted net income (including adjusted diluted earnings per share) and adjusted EBITDA are used by management and the Board to assess the performance of the Company's business.

Non-GAAP measures have limitations in that they do not reflect all of the amounts associated with the Company's results of operations as determined in accordance with GAAP. Also, other companies might calculate these measures differently. Investors are encouraged to review the reconciliations of the non-GAAP financial measures to their most directly comparable GAAP measures included on slide 6 and in the Appendix of this presentation.

**Note:** Financial guidance takes into account a number of factors, including the Company's sales pipeline, existing backlog and expectations of net awards, trends in cancellations and delays, expected interest rates resulting in interest expense of approximately \$84 – 87M, expected non-GAAP tax rate of 24.0%, and estimated diluted share count of 105.2 million shares, which will vary by quarter, and excludes any share repurchases subsequent to the second quarter of 2021. In addition, this guidance represents the Company's best efforts to estimate the impact of COVID-19 on its business, recognizing that factors related to COVID-19, including the severity and duration of the pandemic, are outside of the Company's control and, given their uncertain nature, could cause the Company's future operating results to be materially different from the Company's current estimates.

1. Revenue guidance assumes current foreign exchange currency rates. In addition, revenue guidance includes approximately 540 – 580 bps of inorganic growth from acquisitions along with a headwind of approximately 110 bps from dispositions during FY 2020.
2. Net income margin is defined as GAAP net income divided by Revenue. Adjusted EBITDA margin is defined as Adjusted EBITDA divided by Revenue.
3. Adjusted Diluted EPS assumes current US tax law remains in effect for FY 2021.

For a reconciliation of the presented Non-GAAP financial measures, please reference slides 18 – 19 in the Appendix of this presentation.

# Reconciliation of GAAP to Non-GAAP Financial Measures

## Footnotes

- a) Represents the amortization of intangible assets associated with acquired backlog, customer relationships, trade names and trademarks, and intellectual property.
- b) Restructuring and other costs consist primarily of severance costs associated with a reduction/optimization of our workforce in line with our expectations of future business operations and termination costs in connection with abandonment and closure of redundant facilities and other lease-related charges.
- c) Represents fees associated with acquisitions, stock repurchases and secondary stock offerings, debt placement and refinancings, and other corporate transactions costs.
- d) Represents non-cash share-based compensation expense related to awards granted under equity incentive plans.
- e) Other (income) expense is comprised primarily of foreign currency exchange gains and losses.
- f) Loss on extinguishment of debt is associated with debt prepayment and refinancing activities.
- g) Represents the income tax effect of the non-GAAP adjustments made to arrive at adjusted net income using an estimated non-GAAP effective tax rate of approximately 24.0% for the three and six months ended June 30, 2021 and June 30, 2020. The Company believes the Non-GAAP effective tax rate reflects our future GAAP effective tax rate. These rates have been adjusted to exclude tax impacts related to valuation allowances recorded against deferred tax assets.
